No

Thank you for everything

Rectangular Snip

-

It would had been interesting to make students from different reams know each other

All the teams worked together and got friends very quickly.

... maybe also that the teachers could eat and do activities together to get to know each other better, at least those who don't know each other that much.

A very interesting cultural program.

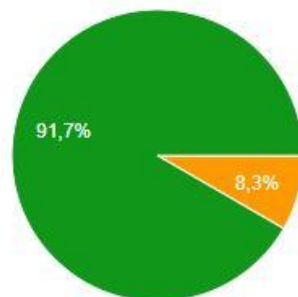

Everything went well and we had such a great time. We loved this place. I feel so lucky to have a chance like that. Thanks for everything and all your efforts.
